

LaTeX Expression Correction

$\Pr(N = 5)$ is 0.00307, so they have been not considered this values and greater k

Rewrite this (latex) in a correct way

Here's a correctly rewritten version of your LaTeX sentence:

latex

Since $\Pr(N = 5) = 0.00307$, values of $k = 5$ and greater have not been considered.

Or, if you want to emphasize a statistical modeling context:

latex

Given that $\Pr(N = 5) = 0.00307$, values of $k \geq 5$ have been excluded from consideration.

Let me know if you'd like it to sound more formal, academic, or casual.
